

Eastern Concrete is the region's leading supplier of site-mix and ready-mixed concrete focusing on quality, flexibility and customer service. Founded in 2002, we operate out of Stowmarket and regional ready-mix depots at Stowmarket, Bury St Edmunds, Cambridge and Norwich, covering the eastern counties with our modern fleet of 30 volumetric & ready-mix concrete trucks.

We specialise in out-of-hours solutions, with weekend and night deliveries by prior arrangement. Our customer service team provide free technical advice and quotations with high levels of quality assured service, making us your first choice for flexibility & service.

Our customers are Local Authorities, Regional & National Contractors, Civil Engineers, HA Approved Contractors, HA Framework Contractors, Rail Contractors, Specialist Fencing and Signage Contractors and the domestic & DIY markets.

Ready-mix  
Pump hire**

## Volumetric - site-mix

Our modern fleet of Volumetric mix trucks provides you with fresh site-mix concrete to your exact requirements. We can mix different strength concrete in one delivery and our flexibility allows us to mix what you want, where you want it, even if you change your mind at the last minute. Each truck has a 5+ metre reach and comes with two wheelbarrows for free use.

## Pump hire

Our CIFA 20m, 24m & 39m boomed concrete pumps provide the complete concrete solution from delivery to placement. By coordinating the supply of concrete and pump we make sure the right amount of concrete arrives at the correct time to provide you with a flexible and cost effective way of placing concrete in those "hard to reach" places with the minimum of fuss.

## Ready-mix

We operate four ready-mixed concrete plants from Stowmarket, Bury St Edmunds, Cambridge & Norwich. Our fleet of 8m<sup>3</sup> and 6m<sup>3</sup> trucks give you delivered & collect facilities with watertight, fibre reinforced, Air Entrained, Rapid Setting and Self-Levelling Flowing Concrete (Ecflow).

All our ready-mix truck drivers operate under strict Health & Safety and come with full PPE and are well versed in most company inductions. All vehicles have reversing cameras, close proximity mirrors, warning lights and reversing alarms.

## Mobile Batching Plant

Our Nisbau Euromix 60 Mobile Batching Plant provides you with the best option for projects that require a focused daily supply, when conventional supply options are not enough.

Projects such as windfarms, large warehouses, concrete frameworks and major civil engineering projects may require a site-based option to cut down interrupted supply and gaps in service, which could have programme and cost implications.
